

KNOWLEDGE PARTNER IN NUTRITION AND HEALTH

rumabiotic

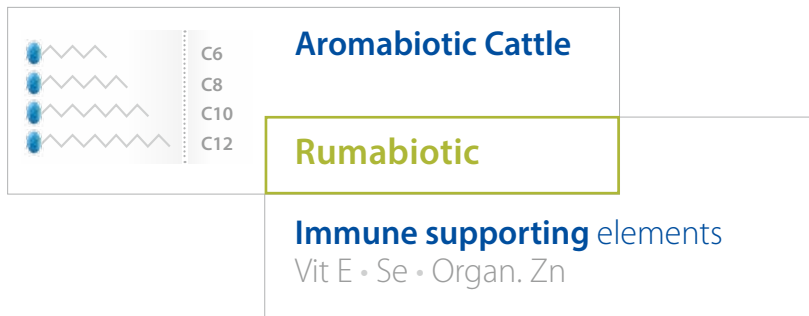

healthy feed for healthy food

Nowadays the emphasis lays on high producing animals which are subject to physiological stress and metabolic and infectious problems during the production cycle. Efforts in maintaining a high health status of the cow will lead to a satisfying production which results in a stable income.

Rumabiotic, for an extra boost

The cow's immunity has been a subject of intense research revealing the beneficial effects of certain vitamins and minerals like vitamin E, Selenium and organic zinc. In **Rumabiotic**, these elements are strengthened by Aromabiotic Cattle, a carefully balanced mixture of Medium Chain Fatty Acids (MCFA).

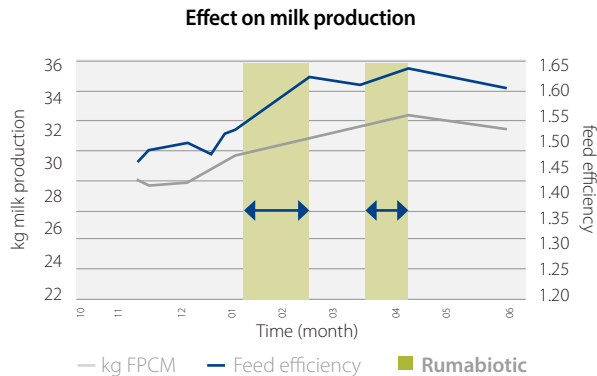

Benefits of Rumabiotic

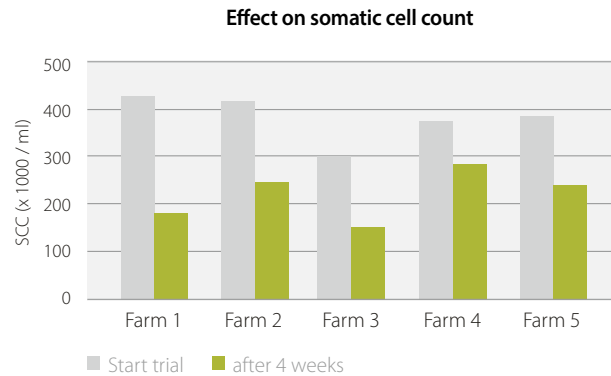

- better general health status
- better technical performances
- reduced somatic cell count
- farm pack solutions

Rumabiotic, trial results in dairy cattle

1. Trial performed at a German dairy herd, with a clear improvement of the feed efficiency and milk production each time **Rumabiotic** was given.

2. Trials were performed at dairy farms whereby **Rumabiotic** was added to the feed. After 4 weeks the dairy herd showed a clear decrease in the somatic cell count (SCC).

Specially developed for cattle

Rumabiotic, a combination of Aromabiotic-MCFA with immune supporting elements.

• Use

Although the dosage can be farm specific, the following inclusion rate is advised: 100 g/cow/day.

• Packaging

25 kg bags.

• Storage

Store cool and dry.
