

Cycostat[®]

Active Ingredient: Robenidine Hydrochloride

- Chemical Coccidiostat
- Quality formulation
- Extremely stable

Cycostat is a coccidiostat premix containing 6.6% (66 grams) of Robenidine Hydrochloride per kilogram of product. Cycostat is effective in preventing and controlling coccidiosis in chickens.

Cycostat can be used:

As an aid in the prevention of coccidiosis caused by *Eimeria mivati*, *E. brunetti*, *E. tenella*, *E. acervulina*, *E. maxima*, and *E. necatrix* in broiler chickens.

Consult your local regulatory authorities for approved methods of use. See package label for complete use directions.

For more information on putting Cycostat to work for you, contact your nearest AlphaPharma representative.
