

Cygro®

Active Ingredient: Maduramicin Ammonium

- Ionophore Coccidiostat
- Quality formulation
- Extremely stable

Cygro is a coccidiostat premix containing 1.0% (10 grams) of Maduramicin Ammonium per kilogram of product. Cygro is effective in preventing and controlling coccidiosis in chickens.

Cygro can be used:

As an aid in the prevention of coccidiosis caused by *Eimeria mivati*, *E. brunetti*, *E. tenella*, *E. acervulina*, *E. maxima*, and *E. necatrix* in broiler chickens.

Consult your local regulatory authorities for approved methods of use. See package label for complete use directions.

For more information on putting Cygro to work for you, contact your nearest AlphaPharma representative.
