

# Borresperse CAFN

## Product Description

Borresperse CAFN is a refined calcium lignosulphonate based product used primarily in plasticizer for concrete, as water reducer for gypsum board and dispersing agent for agrochemicals.

CAS No. 8061-52-7 (Calcium lignosulphonate).

## Sales Specifications

		Test Method
Dry matter %	50.0 ± 2.0	BLT-311
pH (10% Solution)	4.9 ± 0.5	BLT-327
Insolubles (v/v) %	Max. 0.8	
Reducing sugars %	Max. 10	

Only active customers are notified of specification changes.

## Typical Analysis\*

### Chemical Data

Parameter	Unit
Chloride	Max. 0.10 %
Alkali content	Max. 2 %

### Physical Data

Parameter	
Colour	Brown

\*The above analyses are not formal specifications and values may change.  
All values calculated on solids where applicable

## Storage Stability:

Borresperse CAFN is stable for several months under normal storage conditions.  
No biocide has been added.

## Compatibility:

Lignosulfonates are compatible with anionic and non-ionic materials, dispersants, wetting agents and most organic and inorganic materials.

## Delivery form:

Ship loads.

## Lead Time:

Two weeks lead time is typical.

**Safety Data Sheets** are available upon request.
